~Mass Destruction~Terrorism...

Madison County
Emergency Management

Before an emergency occurs...

👉 **Be informed & Plan Ahead** A little advance planning can help avoid last minute frustrations.

Know your Town and County's **Disaster & Emergency Plan**. Work with your community for advanced preparation: Local Emergency Planning Committee (LEPC), and Citizen Corps Council (CCC).

👉 **Discuss and prepare with Family members** where you will go and what you will take before an emergency threatens. Determine a family meeting place, and out-of-state contact. Prepare a disaster kit that will provide for 72 hours minimum:

Food, shelter, water, medications,
basic sanitary needs, extra
clothing, radio and batteries.

👉 **Area Radio and Television Stations will broadcast the warning**, the population protection phase, and periodic updates. Appropriate information, evacuation routes, shelter sites, and telephone numbers will be disseminated for each incident.

POPULATION PROTECTION PHASE

Public Protection Phases will be broadcast over area media outlets.

ALERT You will be advised of the emergency and recommended response.

WARNING Prepare for evacuation. Information about moving property and livestock will be provided. Some residents should temporarily relocate during this stage. If you are away from your home during

this time, leave name and phone number on door or window where it can be seen.

REQUEST Dangerous conditions exist and you will be asked to leave within a specified time period along designated routes. Check-in at nearest public assistance center.

ORDER Immediate evacuation mandatory to protect the lives of area occupants and emergency personnel. Check in at nearest public assistance center.

DO NOT CALL 9-1-1

The 9-1-1 Center is designed and staffed to dispatch emergency services. They are not equipped to serve as an information resource.

👉 **Stay informed**

Population protection is a cooperative effort. Stay tuned to media outlets for situation updates. Listen and ask questions of emergency services representatives. If time permits a resident information site will be established in the area and up-to-date information will be posted.

After the emergency...

During **RECOVERY** Phase, residents will be allowed to return as soon as it is safe. This may initially involve brief visits to inspect property. A wide range of assistance will be provided by emergency and human service organization.
